WHO WE ARE

Engineering and education, built on one AI backbone

AI LINC is a Hyderabad-based technology and learning company. Our **Technology & Software Services** vertical designs, builds and secures production systems for enterprise clients. Our **Education & Institutional Learning** vertical supplies trainers, curriculum and a white-label LMS to governments, universities and EdTech platforms. Both are led by founders with enterprise engineering backgrounds, and both draw on the same practitioner talent pool.

THE STRUCTURE

Two verticals, two domains, one delivery team

VERTICAL 01

Technology & Software Services

Product engineering, AI/ML systems, cybersecurity and GRC, data and cloud platforms — delivered as full builds, augmented squads or advisory engagements for enterprise and government clients.

ailinc.com

Shubham Lal — Co-Founder & CEO

Eight years at Microsoft across AI and cloud systems. Leads technology delivery and institutional partnerships.

[LINKEDIN](#)

VERTICAL 02

Education & Institutional Learning

Trainers, mentors, curriculum design and a white-label AI-native LMS supplied strictly business-to-business and business-to-government — to institutions, platforms and corporate L&D teams.

ailinc.in

Sandeep Volam — Co-Founder & Chairman

Leads corporate governance, people operations and commercial expansion across the Gulf region.

01

Technology & Software Services

AILINC.COM • ENTERPRISE ENGINEERING & SECURITY

We build and secure production software for enterprise and public-sector clients. Engagements run from **full product builds** to **embedded engineering squads** and **independent security and compliance assessments** — sized against the delivery capacity we actually hold.

CAPABILITIES

Build it, run it, secure it

01 BUILD

Product Engineering

Taking a system from architecture to something real users depend on.

AI / ML Product Engineering

Applied AI systems and AI-native features, prototype to production.

Full-Stack Development

Web and platform engineering across modern stacks.

Data Engineering

Pipelines, warehousing and the analytics layer above them.

02 RUN

Platform Reliability

Making sure it holds up once traffic, scale and release cadence arrive.

Cloud & DevOps

Cloud architecture, CI/CD, infrastructure-as-code, release automation.

Performance Testing

Load, stress and reliability testing before real users find the limits.

Monitoring & Reliability

Observability, alerting and incident response once a system is carrying real load.

03 SECURE

Security & Compliance

Independent assurance, whether or not we built the system in question.

Cybersecurity & VAPT

Penetration testing and security assessment against real threat models.

Governance, Risk & Compliance

Programmes spanning GDPR, PDPL and sector-specific regulation.

Audit & Certification Readiness

Gap assessment and evidence preparation ahead of a formal audit.

ENGAGEMENT MODELS

Three levels of ownership

Assessment & Advisory

We review, you act. Independent security, compliance and architecture assessments delivered as a report with findings you can act on internally.

Resource Augmentation

We build alongside you. Vetted engineers embed into your existing teams, reporting into your leads and working to your standards and sprint cadence.

Project Delivery

We own the outcome. Scoped builds with defined milestones, acceptance criteria and a delivery team accountable end to end.

02 Education & Institutional Learning

AILINC.IN • B2B & B2G ONLY

We supply the people, content and platform that institutions use to run their own programmes. We do **not** enrol students directly — every engagement is with a government body, university, college, EdTech platform or corporate L&D team.

WHAT WE SUPPLY

People, content, platform

PEOPLE

01

Trainer Marketplace

Working practitioners with two to ten-plus years of experience, sourced from MAANG and top product companies, matched to your programme requirements and delivery calendar.

PEOPLE

02

Mentors, Mocks & Masterclasses

An on-demand pool for interview preparation, mentorship tracks, guest webinars and industry masterclasses, layered onto programmes you already run.

CONTENT

03

Curriculum & Content Design

Learning roadmaps, session-level breakdowns, assignments, projects, MCQ banks and assessments — built to your academic structure and outcome requirements.

PLATFORM

04

The AI LINC LMS

Adaptive, AI-native, white-label and multi-tenant — your brand and domain on the front, our intelligence layer underneath. **Covered in full overleaf.**

WHO WE SERVE

**Government
training programmes**

**EdTech
platforms**

**Universities
& colleges**

**Corporate
L&D teams**

COLLEGE & UNIVERSITY ASSOCIATIONS

Multi-year academic partnerships.

EDTECH ASSOCIATIONS

Our institutional footprint is concentrated in Telangana and the Gulf, and we grow it deliberately rather than as fast as we could. **We size engagements against the delivery capacity we actually hold** — trainers, content teams and platform support are committed per programme before a proposal goes out.

CONTINUED FROM VERTICAL 02

The AI LINC LMS

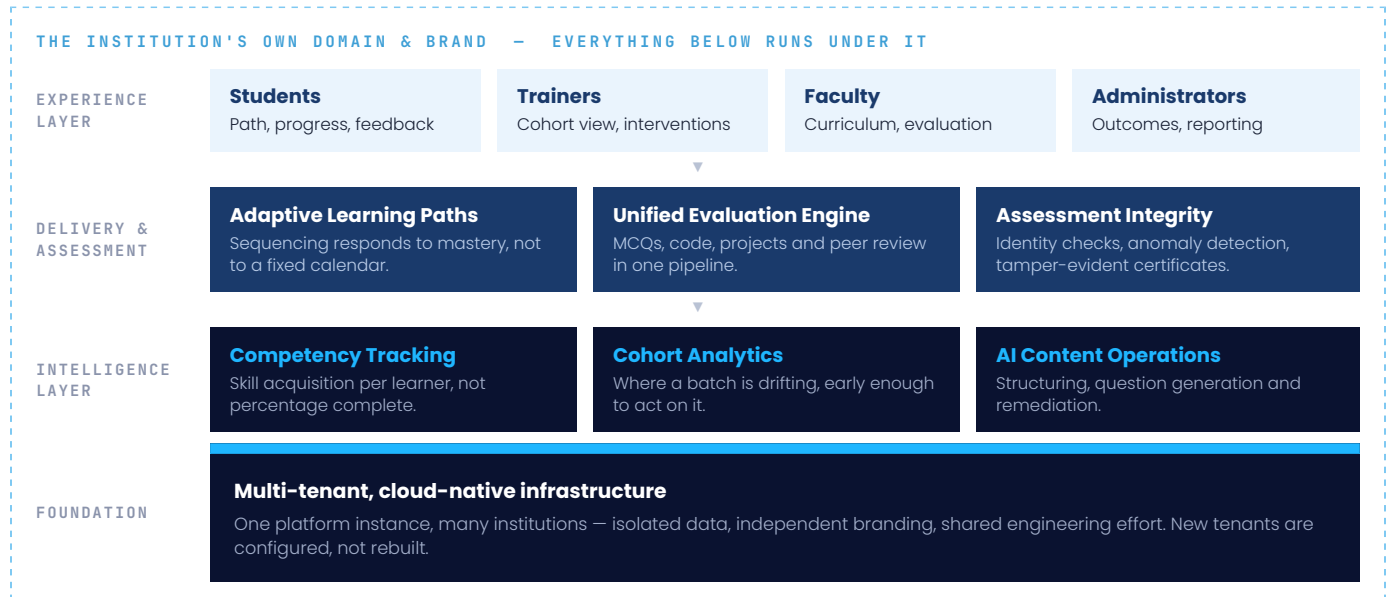

AILINC.IN • WHITE-LABEL • MULTI-TENANT • AI-NATIVE

Trainers and curriculum are what an institution buys first. The platform is what makes the second and third programme cheaper to run than the first. **Every AI LINC engagement can sit on our LMS — under the institution's own brand, on the institution's own domain**, with our intelligence layer underneath rather than in front.

PLATFORM CAPABILITIES

One stack, four layers deep
