

What we have actually built.

Twenty-five-plus product engagements across five countries — platforms in healthcare compliance, governance, higher education and skilling. Eight are set out here; each one shipped, in production, and still running.

THE PORTFOLIO

Eight builds, five markets

Accrepro

PROJECT 01

Multi-Tenant Compliance Intelligence Platform

Multi-tenant accreditation and compliance platform for clinics, hospitals and academic medical centres, with role-based evidence workflows, immutable audit trails and PDPL-aligned data residency.

MULTI-TENANT

RBAC

AUDIT TRAILS

PDPL

RTIH

PROJECT 02

API-First Innovation Ecosystem Platform

Innovation-ecosystem platform covering programme operations, partner directories and founder tooling — headless CMS with an API-driven front end and automated release pipelines.

HEADLESS CMS

REST APIs

CI/CD

CLOUD

Audix GRC

PROJECT 03

Continuous Assurance & Controls Engine

GRC product engineering — audit workflow automation, evidence management and continuous readiness scoring, driven by a rules engine mapping controls to live system state.

RULES ENGINE

WORKFLOW AUTOMATION

SSO

SECURITY

PROJECT 04

Retrieval-Augmented Academic Intelligence

Applied AI and academic content systems for a Gulf institution — retrieval-augmented generation over institutional material, with vector search and human-in-the-loop review.

LLM / RAG

VECTOR SEARCH

PYTHON

CLOUD

PROJECT 05

Event-Driven Skills Intelligence Platform

Upskilling platform with analytics-driven learner tracking, cohort management and automated skill assessment, built on an event-driven data pipeline feeding real-time dashboards.

EVENT PIPELINE

AUTO-GRADING

ANALYTICS

AWS

PROJECT 06

High-Concurrency Campus Network Platform

Education networking and campus-services platform at scale — high-concurrency APIs, distributed caching and load-tested release paths across a large institutional user base.

MICROSERVICES

CACHING

LOAD TESTING

CDN

PROJECT 07

Enrolment & Programme Data Platform

Platform engineering for an executive-education provider — enrolment funnels, cohort operations and a reporting warehouse consolidating programme and partner data.

DATA WAREHOUSE

ETL

INTEGRATIONS

ANALYTICS

PROJECT 08

Cloud-Native Delivery & Observability

Embedded engineering partnership covering build, integration and ongoing platform support — infrastructure-as-code, containerised deployment and full-stack observability.

IaC

KUBERNETES

OBSERVABILITY

CI/CD

ALSO DELIVERED

Advanced and specialist work

SOVEREIGN AI

LMS architecture for a Gulf client, designed for in-Kingdom data residency and sovereign LLM hosting.

APPLIED AI

Clinical and operational AI systems for a healthcare provider group in Saudi Arabia.

CONTENT PIPELINES

Automated e-book generation pipeline converting source material into structured, publishable coursebooks.

SUPPLY CHAIN

Visibility and operations platform for a logistics operator in the UAE.

ENTERPRISE BI

Reporting and analytics layer for an engineering group in the Kingdom, consolidating fragmented systems.

EMBEDDED LEADERSHIP

Dedicated engineering pod plus CTO-level technology leadership for a venture-backed product company.

BFSI SECURITY

Cybersecurity and GRC capability programmes built for banking-sector requirements.

PERFORMANCE

Load, stress and reliability programmes run ahead of high-traffic platform launches.

MODERNISATION

Legacy systems decomposed into services with staged, zero-downtime cutover.

+20

further engagements delivered

Across product engineering, AI, data, cloud and security — including work we cannot name here. Full detail available under mutual non-disclosure.
